

# Christmas Tree

You will need:

Small Tree:	Medium Tree
1 x Green 160	2 x green 160
½ x brown 160 or 260	2 x green 260
1 x white 260	½ x brown 260
	1 x white 260

For larger tree just add more layers and bring in 350 or 360 balloons towards the bottom.

Inflate a green 160 balloon leaving a 4" tip. Pull it through your hand to stretch it a little bit. Make a 1" bubble followed by three ¾" pinch twists.

Make a very small bubble, about ½".

Next make three pinch twists. (Bigger than the previous three).

Continue with another ½" bubble followed by three 2" loops.

Make a ½" bubble followed by three 3" loops. If you want a small tree remove any remaining balloon and add a brown trunk. Here I used a 260 scrap.

Here I have used a brown 160 scrap for a thinner trunk.

If you want a bigger tree you could inflate another 160 balloon and continue with each row getting bigger. Add a 260 balloon if you go any bigger.

Here I have used two 160 and two 260 balloons. I don't tend to make my trees very tidy as you can see. I like a more rugged look but you might prefer to have a more precise tree.
